

National Water Sports Centre Initiative 2019/2020

Update: 15 November 2019

Welcome to the fourth update on the implementation of the National Water Sports Centre Initiative.

Water Supply Works

Works have recently been completed on the replacement of a water main within the site. This water main has had a number of repairs over recent years and it was decided that, given the age and condition of the pipe, that full replacement would be desirable.

Sewerage System Works

Investigations are underway to assess different options to upgrade or replace the sewerage pump station adjacent to the main rowing shed. This facility has also required constant repairs in recent years and it is desirable to implement a solution that will provide a more reliable sewerage solution for the site moving forward.

Electrical Works

Electrical works are underway to support the installation of lighting to the main carpark, roadway and entrance as well as supporting the installation of the new site security system. Capacity has also been included to

enable the installation of an automatic entry gate into the future should this be required.

Site Security

The installation of the new security system is being organised and will closely follow the completion of the electrical works.

The new security system will include CCTV cameras to record any criminal or antisocial behaviour on site and provide an increased level of security for both site users and property.

Road and Car Park Construction

With the adverse weather we have experienced over the winter and spring period and the works to underground infrastructure taking place, the sealing of the road and carpark has been delayed. However, it is expected to progress quickly once these works to underground services are complete.
